GETTING STARTED

SPEED CONTROL GUIDE

All speeds have a feature that automatically starts the Stand Mixer at a lower speed to help avoid ingredient splash-out and “flour puff” at start-up, then quickly increases to the selected speed for optimal performance.

Speed	Used for	Accessories	Description
1	Stirring	Flat Beater	For slow stirring, combining, mashing, starting all mixing procedures. Use to add flour and dry ingredients to batter, and add liquids to dry ingredients. Do not use speed 1 to mix or knead yeast doughs.
2	Slow Mixing, Kneading	Flat Beater and Spiral Dough Hook	For slow mixing, mashing, faster stirring. Use to mix and knead yeast doughs, heavy batters, and candies; start mashing potatoes or other vegetables; cut shortening into flour; mix thin or splashy batters.
4	Mixing, Beating	Flat Beater and Wire Whip	For mixing semi-heavy batters, such as cookies. Use to combine sugar and shortening and to add sugar to egg whites for meringues. Medium speed for cake mixes.
6	Beating, Creaming	Flat Beater and Wire Whip	For medium-fast beating (creaming) or whipping. Use to finish mixing cake, doughnut, and other batters. High speed for cake mixes.
8-10	Fast Beating, Whipping, Fast Whipping	Wire Whip	For whipping cream, egg whites, and boiled frostings. For whipping small amounts of cream, egg whites or for final whipping of mashed potatoes.

NOTE: Use speed 2 to mix or knead yeast doughs. Use of any other speed creates high potential for Stand Mixer failure. The Dough Hook efficiently kneads most yeast dough within 4 minutes.

ACCESSORY GUIDE

Accessory	Use to mix	Description
Flat Beater*	Normal to heavy mixtures	Cakes, creamed frostings, candies, cookies, biscuits, pie pastry, meat loaf, mashed potatoes.
Spiral Dough Hook*	Mixing and kneading yeast doughs	Breads, rolls, coffee cakes buns.
Wire Whip	Mixtures that need air incorporated	Eggs, egg whites, heavy cream, boiled frostings, sponge cakes, mayonnaise, some candies.

*Included with select models only. Also available as optional accessory.

PRODUCT ASSEMBLY

Turn the Stand Mixer to OFF (0) and then unplug.

Place Bowl Lift Lever in down position.

To attach the Bowl: Place Bowl Lift Lever in down position. Fit bowl supports over Locating Pins. Press down on back of bowl until bowl pin snaps into spring latch.

To Attach the Accessory: Slip Flat Beater on Beater Shaft and press upward as far as possible. Turn beater to right, hooking beater over the pin on shaft.

Rotate lever to straight-up position. Bowl must always be in raised, locked position when mixing.

PRODUCT USAGE

BEATER TO BOWL CLEARANCE

Your Stand Mixer is adjusted at the factory so the Flat Beater just clears the bottom of the bowl. If, for any reason, the Flat Beater hits the bottom of the bowl or is too far away from the bowl, you can correct clearance easily.

Turn the Stand Mixer to "0" (Off) and unplug.

Place Bowl Lift Lever in down position.

Adjust so Flat Beater just clears bottom surface of Bowl when in lifted position by turning screw counterclockwise to raise the Bowl and clockwise to lower the Bowl. Just a slight turn is all that is required: the screw (A) will not rotate more than 1/4 turn (90 degrees) in either direction. (The full range of adjustment is 1/2 turn, or 180 degrees.)

NOTE: When properly adjusted, the Flat Beater will not strike on the bottom or side of the Bowl. If the Flat Beater or the Wire Whip is so close that it strikes the bottom of the Bowl, the Beater or Whip may wear.

PRODUCT USAGE

	Failure to follow these instructions can result in death, fire, or electrical shock.

Problem	Solution
The Stand Mixer may warm up during use:	Under heavy loads with extended mixing time, you may not be able to comfortably touch the top of the Stand Mixer. This is normal.
If the Stand Mixer stops due to overload:	Slide the Speed Control Lever to Off (0). After a few minutes, the Stand Mixer will automatically reset. Slide the Speed Control Lever to the desired speed and continue mixing.
The Stand Mixer may emit a pungent odor, especially when new:	This is common with electric motors.
If the Flat Beater hits the bowl:	Stop the Stand Mixer. See "Product Assembly" section.
If the Speed Control Lever does not move smoothly or easily:	To move the Speed Control Lever with ease, lift slightly up as you move it across the settings in either direction.
If your Stand Mixer should fail to operate, please check the following:	Is the Stand Mixer plugged in?
	Is the fuse in the circuit to the Stand Mixer in working order? If you have a circuit breaker box, be sure the circuit is closed.
	Turn off the Stand Mixer for 10-15 seconds, then turn it back on. If the Stand Mixer still does not start, allow it to cool for 30 minutes before turning it back on.
If the problem cannot be corrected:	See the "Terms of KitchenAid Guarantee ("Guarantee")" section. Do not return the Stand Mixer to the retailer; retailers do not provide service.
