

User Guide

Side by Side Refrigerator

LEARN MORE

In an effort to conserve natural resources, this refrigerator includes a condensed User Guide. A complete User Instructions manual for your model can be downloaded at www.whirlpool.com/manuals. The model number is located on the inside wall of the refrigerator compartment. To request a printed copy of the User Instructions manual, call 1-800-253-1301. (Shipping and handling fees may apply.)

Register your refrigerator at www.whirlpool.com.

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING." These words mean:

AWARNING

You can be killed or seriously injured if you don't immediately follow instructions.

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: To reduce the risk of fire, electric shock, or injury when using your refrigerator, follow these basic precautions:

- Plug into a grounded 3 prong outlet.
- Do not remove ground prong.
- Do not use an adapter.
- Do not use an extension cord.
- Disconnect power before servicing.
- Replace all parts and panels before operating.
- Remove doors from your old refrigerator.

- - Use nonflammable cleaner.
 - Keep flammable materials and vapors, such as gasoline, away from refrigerator.
 - Use two or more people to move and install refrigerator.
 - Disconnect power before installing ice maker (on ice maker kit ready models only).
 - Use a sturdy glass when dispensing ice (on some models).
 - Do not hit the refrigerator glass doors (on some models).

SAVE THESE INSTRUCTIONS

State of California Proposition 65 Warnings:

WARNING: This product contains one or more chemicals known to the State of California to cause cancer.

WARNING: This product contains one or more chemicals known to the State of California to cause birth defects or other reproductive harm.

PROPER DISPOSAL OF YOUR OLD REFRIGERATOR

AWARNING

Suffocation Hazard

Remove doors from your old refrigerator.

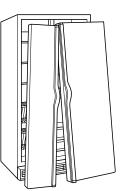

Failure to do so can result in death or brain damage.

IMPORTANT: Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators are still dangerous, even if

they will sit for "just a few days." If you are getting rid of your old refrigerator, please follow these instructions to help prevent accidents.

Before You Throw Away Your Old Refrigerator or Freezer:

- Take off the doors.
- Leave the shelves in place so that children may not easily climb inside.

Important information to know about disposal of refrigerants:

Dispose of refrigerator in accordance with Federal and Local regulations. Refrigerants must be evacuated by a licensed, EPA certified refrigerant technician in accordance with established procedures.

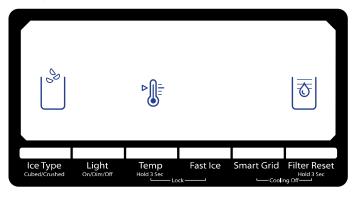

OPERATING YOUR REFRIGERATOR

Using the Controls

The refrigerator and freezer controls are located on the dispenser panel.

IMPORTANT: The display screen on the dispenser control panel will turn off automatically and enter "sleep" mode when the control buttons and dispenser pads have not been used for 2 minutes or more. While in "sleep" mode, the first press of a control button will only reactivate the display screen, without changing any settings.

 Touch any control button on the dispenser panel to activate the display screen. The home screen will appear as shown.

Adjusting the Controls

For your convenience, your refrigerator and freezer controls are preset at the factory. When you first install your refrigerator, make sure that the controls are still set to the "mid-settings." The factory recommended set points are $37^{\circ}F$ (3°C) for the refrigerator and 0°F (-18°C) for the freezer.

IMPORTANT:

 Wait 24 hours before you put food into the refrigerator. If you add food before the refrigerator has cooled completely, your food may spoil.

NOTE: Adjusting the set points to a colder than recommended setting will not cool the compartments any faster.

- If the temperature is too warm or too cold in the refrigerator or freezer, first check the air vents to be sure they are not blocked before adjusting the controls.
- The preset settings should be correct for normal household usage. The controls are set correctly when milk or juice is as cold as you like and when ice cream is firm.
- Wait at least 24 hours between adjustments. Recheck the temperatures before other adjustments are made.

To view and adjust the set points, press and hold the TEMP button for 3 seconds. When adjust mode is activated, adjusting information will appear on the display screen.

NOTE: To view Celsius temperatures, press the LIGHT button when adjust mode is activated. To return the display setting to Fahrenheit, press LIGHT again.

- When adjust mode is activated, the display screen shows the refrigerator set point and "FRIDGE" appears.
- Press SMART GRID to raise the set point, or press FAST ICE to lower the set point.
- When you have finished viewing (and adjusting if desired) the refrigerator set point, press TEMP to change the display to show the freezer set point. When the zone has been changed, "FREEZER" appears on the display screen.
- Press SMART GRID to raise the set point, or press FAST ICE to lower the set point.
- When you have finished viewing (and adjusting if desired) both the refrigerator and freezer set points, press FILTER to save the settings.

NOTE: To exit without saving changes, press ICE TYPE at any time while in adjust mode, or allow about 60 seconds of inactivity and adjust mode will turn off automatically.

When adjusting temperature set points, use the following chart as a guide.

CONDITION:	TEMPERATURE ADJUSTMENT:
REFRIGERATOR too cold	REFRIGERATOR Setting 1° higher
REFRIGERATOR too warm	REFRIGERATOR Setting 1° lower
FREEZER too cold	FREEZER Setting 1° higher
FREEZER too warm / Too little ice	FREEZER Setting 1° lower

The set point range for the refrigerator is 33° F to 45° F (0° C to 7° C). The set point range for the freezer is -5° F to 5° F (-21° C to -15° C).

Cooling On/Off

Your refrigerator and freezer will not cool when cooling is turned off.

 To turn cooling off, press and hold the SMART GRID and FILTER buttons at the same time for 3 seconds.

IMPORTANT: To avoid unintentionally locking the dispenser or changing other settings, be sure to press both buttons at exactly the same time.

When cooling is off, "COOLING OFF" will appear on the display screen.

 Press and hold SMART GRID and FILTER for 3 seconds again to turn cooling back on.

Smart Grid

See the "Smart Refrigerator" instruction sheet for information about setting up Smart Grid functionality, turning it on and off, receiving important notifications, and taking advantage of available features.

Delay Ice

For information about the Delay Ice feature that is associated with Smart Grid functionality, see the "Smart Refrigerator" instruction sheet.

Additional Features

Fast Ice

The Fast Ice feature assists with temporary periods of heavy ice use by increasing ice production over a 24-hour period.

IMPORTANT: This feature only works if the ice maker is turned on. See "Ice Maker and Storage Bin."

Press FAST ICE to turn on the Fast Ice feature. When the feature is on, the Fast Ice icon will appear on the dispenser display screen. The Fast Ice setting will remain on for 24 hours unless manually turned off.

To manually turn off the Fast Ice feature, press FAST ICE again or adjust the freezer temperature set point. The Fast Ice icon will disappear when the feature is off.

NOTE: If increased ice production is desired at all times, change the freezer set point to a lower setting. Setting the freezer to a colder temperature may make some foods, such as ice cream, harder.

Door Ajar Alarm

The Door Ajar Alarm feature sounds an alarm when the refrigerator or freezer door is open for 5 minutes and the product cooling is turned on. The alarm will repeat every 2 minutes. Close both doors to turn it off. The feature then resets and will reactivate when either door is left open again for 5 minutes.

NOTE: To mute the audible alarm while keeping the doors open, such as while cleaning the inside of the refrigerator, press any button on the control panel. The alarm sound will be temporarily turned off, but the Door Ajar icon will still be displayed on the dispenser control panel.

Convertible Drawer Temperature Control (on some models)

The control can be adjusted to properly chill meats or vegetables. The air inside the pan is cooled to avoid "spot" freezing and can be set to keep meats at the National Livestock and Meat Board recommended storage temperatures of 28° to 32° F (- 2° to 0° C).

To store meat:

Set the control to one of the three MEAT settings to store meat at its optimal storage temperature.

To store vegetables:

Set the control to VEG to store vegetables at their optimal storage temperatures.

NOTE: If food starts to freeze, move the control to the right (less cold), toward the VEG setting. Remember to wait 24 hours between adjustments.

Crisper Humidity Control (on some models)

You can control the amount of humidity in the moisture-sealed crisper. Adjust the control to any setting between LOW and HIGH.

LOW (open) for best storage of fruits and vegetables with skins.

HIGH (closed) for best storage of fresh, leafy vegetables.

Chilled Door Bin (on some models)

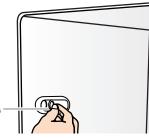

Cool air from the freezer is directed to the refrigerator door bin directly beneath the vents.

NOTE: The dairy compartment and can rack are not associated with the Chilled Door Bin feature.

Chilled Door Bin Control

The chilled door bin control is located on the left-hand side of the refrigerator compartment.

- Slide the door chill control to the left to reduce the flow of cold air to the bin and make it less cold.
- Slide the door chill control to the right to increase the flow of cold air to the bin and make it colder.

A. Chilled door bin control

ICE AND WATER

Water and Ice Dispensers

NOTES:

- The dispensing system will not operate when either door (refrigerator or freezer) is open.
- Allow 24 hours for the refrigerator to cool down and chill water.
- Allow 24 hours to produce the first batch of ice. Discard the first three batches of ice produced. Wait 72 hours for full ice production.
- The display screen on the dispenser control panel will turn off automatically and enter "sleep" mode when the control buttons and dispenser pads have not been used for 2 minutes or more. While in "sleep" mode, the first press of a control button will only reactivate the display screen, without changing any settings.

Flush the Water System

Air in the water dispensing system can cause the water dispenser to drip. After connecting the refrigerator to a water source or replacing the water filter, flush the water system. Flushing the water dispensing system forces air from the water line and filter, and prepares the water filter for use.

NOTE: As air is cleared from the system, water may spurt out of the dispenser.

- 1. Using a sturdy container, depress and hold the water dispenser pad for 5 seconds, then release it for 5 seconds.
- 2. Repeat Step 1 until water begins to flow.
- Once water begins to flow, continue depressing and releasing the dispenser pad (5 seconds on, 5 seconds off) until a total of 3 gal. (12 L) has been dispensed.

Additional flushing may be required in some households.

The Water Dispenser IMPORTANT:

- Dispense at least 1 qt (1 L) of water every week to maintain a fresh supply.
- If the flow of water from the dispenser decreases, it could be caused by low water pressure.
 - With the water filter removed, dispense 1 cup (237 mL) of water. If 1 cup of water is dispensed in 8 seconds or less, the water pressure to the refrigerator meets the minimum requirement.
 - If it takes longer than 8 seconds to dispense 1 cup of water, the water pressure to the refrigerator is lower than recommended. See "Water Supply Requirements" (in the User Instructions or the Installation Instructions and Owner's Manual) or "Problem Solver" for suggestions.

To Dispense Water:

1. Press a sturdy glass against the water dispenser pad. Hold the glass close to the water dispenser spout to ensure that the water dispenses into the glass.

A. Water dispenser spout

2. Remove the glass to stop dispensing.

The Ice Dispenser

Ice dispenses from the ice maker storage bin in the freezer when the dispenser pad is pressed. To turn off the ice maker, see "Ice Maker and Storage Bin."

Your ice maker can produce both crushed and cubed ice. Before dispensing ice, select which type of ice you prefer by pressing the ICE TYPE button.

The display screen indicates which type of ice is selected.

For crushed ice, cubes are crushed before being dispensed. This may cause a slight delay when dispensing crushed ice. Noise from the ice crusher is normal, and pieces of ice may vary in size. When changing from crushed to cubed, a few ounces of

crushed ice will be dispensed along with the first cubes.

To Dispense Ice:

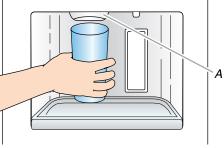

1. Make sure the desired type of ice is selected. To switch between cubed and crushed, press ICE TYPE.

Use a sturdy glass when dispensing ice.

Failure to do so can result in cuts.

2. Press a sturdy glass against the ice dispenser pad. Hold the glass close to the ice guide to ensure that the ice dispenses into the glass.

A. Ice guide

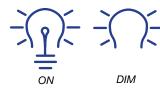

IMPORTANT: You do not need to apply a lot of pressure to the pad in order to activate the ice dispenser. Pressing hard will not make the ice dispense faster or in greater quantities.

3. Remove the glass to stop dispensing.

NOTE: Ice may continue to dispense for several seconds after removing the glass from the pad. The dispenser may continue to make noise for a few seconds after dispensing.

The Dispenser Light

When you use the dispenser, the light will automatically turn on. If you want the light to be on continuously, you may choose either ON or DIM. The display screen indicates which mode is selected.

ON: Press LIGHT to turn the dispenser light on.

DIM: Press LIGHT a second time to select DIM mode. The dispenser light will remain on, but at a lower intensity.

OFF: Press LIGHT a third time to turn the dispenser light off.

The dispenser lights are LEDs that cannot be changed. If it appears that your dispenser lights are not working, see "Problem Solver" for more information.

The Dispenser Lock

The dispenser can be turned off for easy cleaning or to avoid unintentional dispensing by small children and pets.

NOTE: The lock feature does not shut off power to the refrigerator, to the ice maker, or to the dispenser light. It simply deactivates the controls and dispenser pads. To turn off the ice maker, see "Ice Maker and Storage Bin."

Press and hold the TEMP and FAST ICE buttons at the same time for 3 seconds to lock the dispenser.

IMPORTANT: To avoid unintentionally locking the dispenser or changing other settings, be sure to press both buttons at exactly the same time.

Press and hold the TEMP and FAST ICE buttons at the same time again to unlock the dispenser.

The display screen indicates when the dispenser is locked.

Ice Maker and Storage Bin

- Allow 24 hours to produce the first batch of ice. Discard the first three batches of ice produced.
- The quality of your ice will be only as good as the quality of the water supplied to your ice maker. Avoid connecting the ice maker to a softened water supply. Water softener chemicals (such as salt) can damage parts of the ice maker and lead to poor quality ice. If a softened water supply cannot be avoided, make sure the water softener is operating properly and is well maintained.
- Do not use anything sharp to break up the ice in the storage bin. This can cause damage to the ice container and the dispenser mechanism.
- Do not store anything on top of or in the ice maker or storage bin.

Turning the Ice Maker On/Off:

The On/Off switch can only be accessed when the ice storage bin has been removed. The switch is located on the freezer door, on the left side of the wall that surrounds the ice storage bin. See the following section for bin removal instructions.

- To turn on the ice maker, slide the control to the ON (left) position.
- To manually turn off the ice maker, slide the control to the OFF (right) position.

NOTE: The ice maker has an automatic shutoff to keep the storage bin from overfilling during normal operation. The ice maker sensors will automatically stop ice production, but the control will remain in the ON (left) position.

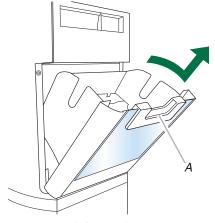

On

Ice Maker Control

Of

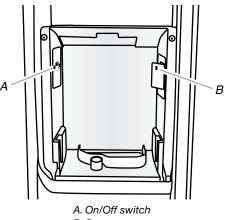

Removing and Replacing the Ice Storage Bin:

1. Press down the release lever and tilt the bucket outward. Use both hands to hold the base of the storage bin, then lift it up and out.

A. Release lever

NOTE: It is not necessary to turn the ice maker control to the OFF (right) position when removing the storage bin. The sensor cover ("flipper door"), located on the right wall of the freezer door, stops the ice maker from producing ice if the door is open or the storage bin is removed.

- B. Sensor cover
- 2. Replace the bin by sliding it onto the door, then tilting it back into an upright position. The release lever will click when the bin is securely in place.

Delay Ice

Smart Grid Event notifications can affect ice production. For information about the Delay Ice feature that is associated with Smart Grid functionality, see the "Smart Refrigerator" instruction sheet.

Water Filtration System

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts.

Water Filter Status Light

The water filter status light will help you know when to change your water filter.

- When the dispenser control panel's water filter status display changes to "ORDER," this tells you that it is almost time to change the water filter cartridge.
- Replace the water filter cartridge when the water filter status display changes to "REPLACE."

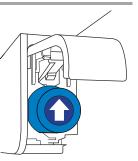

If water flow to your water dispenser or ice maker decreases noticeably, change the filter sooner. The filter should be replaced at least every 6 months, depending on your water quality and usage.

After changing the water filter, reset the status light by pressing and holding the FILTER button for 3 seconds. When the system is reset, the "ORDER" and "REPLACE" icons will disappear from the display screen.

Changing the Water Filter

- 1. Locate the water filter in the top-right corner of the refrigerator compartment.
- 2. Lift open the filter cover door. The filter will be released and then be ejected as the door is opened.
- **3.** When the door is completely open, pull the filter straight out.

NOTE: There may be some water in the filter. Some spilling may occur. Use a towel to wipe up any spills.

- 4. Take the new filter out of its packaging and remove the covers from the O-rings. Be sure the O-rings are still in place after the covers are removed.
- 5. With the arrow pointing up, align the new filter with the filter housing and slide it into place. The filter cover door will automatically begin to close as the new filter is inserted.
- 6. Close the filter cover door completely in order to snap the filter into place. You may need to press hard.
- 7. Flush the water system. See "Water and Ice Dispensers."

ACCESSORIES

The following accessories are available for your refrigerator. To order an accessory, call **1-800-442-9991** and ask for the part number listed below or contact your authorized Whirlpool dealer. In Canada, call **1-800-807-6777**.

affresh[®] Stainless Steel Cleaner: Order Part #W10355016

In Canada, order Part #W10355016B

affresh[®] Stainless Steel Wipes: Order Part #W10355049 In Canada, order Part #W10355049B

affresh[®] Kitchen & Appliance Cleaner: Order Part #W10355010 In Canada, order Part #W10355010B

Water Filter: Order Part #W10295370 (P4RFWB)

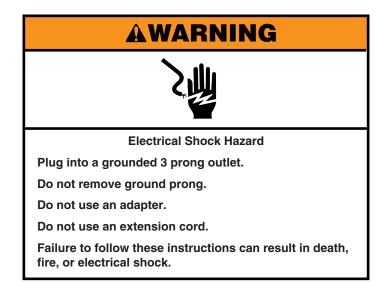

Air Filter: Order Part #W10311524

PROBLEM SOLVER

For recommendations that may help you avoid a service call, scan the code at left with your mobile device, or visit *www.whirlpool.com/product_help*.

For a complete Problem Solver listing with more information about additional topics, see the Installation Instructions and Owner's Manual provided with your refrigerator, or visit our website and download the User Instructions for your model.

PROBLEM	Possible Causes and/or Recommended Solutions	
Refrigerator		Not connected to an electrical supply - Plug the power cord into a grounded 3 prong outlet. Do not use an extension cord.
will not operate		No power to the electrical outlet - Plug in a lamp to see if the outlet is working.
	•	Household fuse has blown or circuit breaker has tripped - Replace the fuse or reset the circuit breaker. If the problem continues, contact a licensed electrician.
		Control or cooling is not turned on - Turn on the refrigerator control, or turn cooling on. See "Using the Controls."
		New installation - Following installation, allow 24 hours for the refrigerator and freezer to cool completely.
		NOTE: Adjusting the temperature control(s) to the coldest setting will not cool either compartment (refrigerator or freezer) more quickly.

PROBLEM	Possible Causes and/or Recommended Solutions	
Refrigerator seems noisy	ne compressor in your new refrigerator regulates temperature more efficiently and uses less energy than older models. During arious stages of operation, you may hear normal operating sounds that are unfamiliar.	
	The following noises are normal:	
	Buzzing/Clicking - Heard when the water valve opens and closes to dispense water or fill the ice maker. If the refrigerator is connected to a water line, this is normal. If the refrigerator is not connected to a water line, turn off the ice maker.	
	Cracking/Crashing - Heard when ice is ejected from the ice maker mold.	
	Popping - Heard when the inside walls contract/expand, especially during initial cooldown.	
	Pulsating/Whirring - Heard when the fans/compressor adjust to optimize performance during normal operation.	
	Rattling - Heard when water passes through the water line, or due to the flow of refrigerant. Rattling may also come from items placed on top of the refrigerator.	
	■ Water running or gurgling - Heard when ice melts during the defrost cycle and water runs into the drain pan.	
	 Sizzling - Heard when water drips onto the heater during the defrost cycle. 	
Motor seems to run too much	Your new refrigerator has an energy-efficient motor - The refrigerator may run longer than you're used to, because the compressor and fans operate at lower speeds that are more energy-efficient. This is normal.	
	NOTE: Your refrigerator may run even longer if the room is warm, a large load of food is added, the doors are opened often, or if a door has been left open.	
Temperature is too warm	New installation - Following installation, allow 24 hours for the refrigerator and freezer to cool completely.	
	NOTE: Adjusting the temperature control(s) to the coldest setting will not cool either compartment (refrigerator or freezer) more quickly.	
	Doors are opened often or not closed completely - This allows warm air to enter the refrigerator. Minimize door openings, keep the doors fully closed, and make sure both doors are properly sealed.	
	■ Air vents are blocked - Remove items that are immediately in front of the vents.	
	■ Large amount of warm food recently added - Allow several hours for the refrigerator to return to its normal temperature.	
	 Controls are not set correctly for the surrounding conditions - Adjust the controls to a colder setting. Check the temperature again in 24 hours. 	

SMART FEATURES	Possible Causes and/or Recommended Solutions	
Low/no ice production	Smart Delay and/or Delay Ice activated - The Smart Grid feature allows the refrigerator to detect when the electric grid is in a period of peak usage or peak rates. When Smart Grid functionality is activated, ice production may be delayed for up to 4 hours, depending on the type of Smart Grid notification received. To return to normal ice production, press the SMART GRID button on the dispenser control panel. Both the Smart Grid and Delay Ice icons will disappear from the display screen.	

WARRANTY

WHIRLPOOL CORPORATION MAJOR APPLIANCE WARRANTY

LIMITED WARRANTY

For one year from the date of purchase, when this major appliance is operated and maintained according to instructions attached to or furnished with the product, Whirlpool Corporation or Whirlpool Canada LP (hereafter "Whirlpool") will pay for Factory Specified Parts and repair labor to correct defects in materials or workmanship that existed when this major appliance was purchased. Service must be provided by a Whirlpool designated service company. YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN. This limited warranty is valid only in the United States or Canada and applies only when the major appliance is used in the country in which it was purchased. Proof of original purchase date is required to obtain service under this limited warranty.

This limited warranty does not cover:

ITEMS EXCLUDED FROM WARRANTY

- 1. Replacement parts or repair labor if this major appliance is used for other than normal, single-family household use or when it is used in a manner that is inconsistent to published user or operator instructions and/or installation instructions.
- 2. Service calls to correct the installation of your major appliance, to instruct you on how to use your major appliance, to replace or repair house fuses, or to correct house wiring or plumbing.
- 3. Service calls to repair or replace appliance light bulbs, air filters or water filters. Consumable parts are excluded from warranty coverage.
- 4. Damage resulting from accident, alteration, misuse, abuse, fire, flood, acts of God, improper installation, installation not in accordance with electrical or plumbing codes, or use of products not approved by Whirlpool.
- 5. Cosmetic damage, including scratches, dents, chips or other damage to the finish of your major appliance, unless such damage results from defects in materials or workmanship and is reported to Whirlpool within 30 days from the date of purchase.
- 6. Any food or medicine loss due to refrigerator or freezer product failures.
- 7. Pickup and delivery. This major appliance is intended to be repaired in your home.
- 8. Repairs to parts or systems resulting from unauthorized modifications made to the appliance.
- 9. Expenses for travel and transportation for product service if your major appliance is located in a remote area where service by an authorized Whirlpool servicer is not available.
- 10. The removal and reinstallation of your major appliance if it is installed in an inaccessible location or is not installed in accordance with Whirlpool's published installation instructions.
- 11. Replacement parts or repair labor on major appliances with original model/serial numbers that have been removed, altered or cannot be easily determined.
- 12. Discoloration, rust, or oxidation of stainless steel surfaces.

DISCLAIMER OF IMPLIED WARRANTIES

IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW. Some states and provinces do not allow limitations on the duration of implied warranties of merchantability or fitness, so this limitation may not apply to you. This warranty gives you specific legal rights, and you also may have other rights that vary from state to state or province to province.

LIMITATION OF REMEDIES; EXCLUSION OF INCIDENTAL AND CONSEQUENTIAL DAMAGES

YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN. WHIRLPOOL SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so these limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you also may have other rights that vary from state to state or province to province.

If outside the 50 United States and Canada, contact your authorized Whirlpool dealer to determine if another warranty applies.

For additional product information, in the U.S.A., visit **www.whirlpool.com**. In Canada, visit **www.whirlpool.ca**.

If you do not have access to the Internet and you need assistance using your product or you would like to schedule service, you may contact Whirlpool at the number below.

Have your complete model number ready. You can find your model number and serial number on the label, located on the inside wall of the refrigerator compartment.

For assistance or service in the U.S.A., call 1-800-253-1301. In Canada, call 1-800-807-6777.

If you need further assistance, you can write to Whirlpool with any questions or concerns at the address below:

In the U.S.A.:

Whirlpool Brand Home Appliances Customer eXperience Center 553 Benson Road Benton Harbor, MI 49022-2692 In Canada:
