CCU / UI Kit Software
MHN33 (220-240 volt / 50 Hz ONLY)

Models

MHN33PD	MHN33PN

Description

Due to a software and HEX file update on the MHN33, both the CCU and the UI must be replaced together.

These changes are to address a small number of potential unbalance retries when installed on a 10" pedestal or on a soft wooden floor.

Two additional changes were made to allow the owner to change the number of times the washer will attempt to balance the load from 4 to 10 and the duration of suds mitigation from 5 minutes down to 0 (zero).

This change was made in production starting with Serial Number: C841.

Explanation

If either the CCU or UI requires replacement, the other part must also be replaced at the same time:

Models MHN33PxCGW: (220-240V/50Hz only)
Service Kit Part Number: W11035159
Contains: W11026502 and W11026495

The PN UI can be easily programmed when used on a PD machine by setting the appropriate steps within the programming for cycle parameters and pricing. Refer to the Installation Instructions provided with the machine for programming information.
