Specifications

Commercial Combination Stack Washer / Dryer

This washer / dryer combination maximizes facility productivity, saves space, and delivers the exceptional cleaning performance end users expect. Within the space of a single unit, the 3.1 cu. ft. washer and 6.7 cu. ft. dryer give users the capacity they need to clean even their bulkiest loads of laundry.

Commercial-Grade Features:

Choose a commercial-built product that withstands heavy traffic, regular use, and performs continuously.

Commercial-Grade Construction

Built with galvanized steel, the heavy-duty construction of the stack washer / dryer is designed to increase machine longevity, and handle the rigorous demands of commercial laundry.

Powerful Drive System

Designed and tested to provide more turns over the life of the washer– this machine helps owners optimize their facility’s productivity, and delivers the performance customers expect. A watertight, flexible triple-lip seal with a garter spring helps keep moisture away from the shaft, protecting the premium bearings – while the durable shaft sleeve is designed to reduce shaft wear.

Automatic Load Balancing

Designed for washing efficiency, this system consists of a six-point suspension, four dampers, and two springs. By sensing and automatically balancing a load, machines are able to work effectively and end on time, creating optimized cleaning cycles and constant turns.

Microprocessor Controls

These controls offer owners the ability to customize vend prices and washer cycle options, such as Super Cycle, ensuring optimal revenue opportunities. Plus, the controls give customers the option to select the ideal cycle for individual wash needs.

ENERGY STAR® certified, and uses an average of 12.24 gallons of water per cycle* which helps reduce energy and water costs.

### WASHER SPECIFICATIONS

#### CAPACITY
- Cylinder Diameter – in. (mm): 21.60 (547)
- Cylinder Depth – in. (mm): 13.40 (340)

#### WATER INLET HOSE / DRAIN HOSE
- Operating Pressure – psi (bar): 20 – 100 (1 – 8)
- Inlet Hose Length – ft. (m): 4 (1.22)
- Drain Hose Length – ft. (m): 6 (1.83)

#### APPROXIMATE WATER USAGE
- Average Total Water Usage Per Cycle – gallons (liters)*: 12.24 (46.33)
- Average Hot Water Usage, Warm Water Cycle – gallons (liters): 1.5 (5.67)
- Average Hot Water Usage, Hot Water Cycle – gallons (liters): 2.28 (8.63)

#### ELECTRICAL REQUIREMENTS
- Voltage: 120V
- Electrical Requirements / Frequency: 60Hz
- Breaker / Fuse – amps: 30

### DRYER SPECIFICATIONS

#### CAPACITY
- Cylinder Volume – cu. ft. (liters): 6.70 (190)
- Cylinder Diameter – in. (mm): 26.3 (666.8)
- Cylinder Depth – in. (mm): 20.4 (518.3)

#### ELECTRICAL REQUIREMENTS
- Voltage: 240V
- Electrical Requirements / Frequency: 60Hz
- Breaker / Fuse – amps: 30

### MACHINE SPECIFICATIONS

#### DIMENSIONS
- Width – in. (mm): 27 (686)
- Depth – in. (mm): 29.50 (751)
- Height – in. (mm): 74 (1,880)

### CRATED DIMENSIONS
- Crated Width – in. (mm): 29.25 (743)
- Crated Depth – in. (mm): 34 (864)
- Crated Height – in. (mm): 75.75 (1,924)

### APPROXIMATE WEIGHT
- Uncrated – lbs. (kg): 372 (169)
- Crated – lbs. (kg): 383 (173)

---

*Based on 2018 United States DOE J2 Testing with factory preset cycles.

**Use 4" (100mm) diameter rigid aluminum or galvanized steel duct. Never use plastic, non-metal, or combustible duct.

**It is recommended that a separate circuit serving only this washer / dryer be provided.

---
